Short Bio: Born in 1984, Etienne de France received a B.A in Art History in Paris, and then completed a B.A in visuals arts in the Iceland Art Academy of Reykjavik. He works with various media, focusing mostly on photography, video and audiovisual performances. Experimenting with diverse presentations that combine those medias (books, installations A/V performances, interactive works), by challenging narration, he is trying to mix these medias in different ways, to create what he calls “poetic-myths”.
