The League of Imaginary Scientists

Address: 3689 Roseview Ave., Los Angeles, CA 90065 USA

Tel: +1 323-868-2222

E-mail: theLeague@imaginaryscience.org

Website: <http://www.imaginaryscience.org>

Short Bio: The League of Imaginary Scientists conducts everyday experiments through creative collaborative inquiry. Tin foil and bicycles are common components of the League's participatory mega-media installations. League contributors range from mechanical engineers to synthetic biologists and include an imaginary boy from Norway. Experiments in *Imaginary Science* have exhibited widely, including at Colombia's *World Year of Physics*, MAS in Barcelona, and Electrofringe in Australia, with collaborative networked interactions at El Festival de la Imagen, Mapping Festival at BAC in Geneva, MAAC in Brussels, and (re)Actor in London. Besides eMobiLArt, the League has held residencies at CESTA in the Czech Republic, Lademoen Kunstnerverksteder in Norway, CalArts, and Gunnery Studios and Casula Powerhouse in Australia.

expertise: creative integration of science and technology and conveying research through playful interactivity
